DETAILED ACTION

1. Claims 9 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

2. The following is a statement of reasons for the indication of allowable subject matter: Prior art failed to establish light emitting device with compound electrode with metal oxide electrode.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-8, 10-13-18 and 37-44 rejected under 35 U.S.C. 102(e) as being anticipated by Heller (2004/0099305)

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C.

102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37

CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Regarding Claims 1-8, 10-13, 18 and 37-44, Heller discloses electrodes mitigating effects of defects in organic electronic devices where in Fig. 3 and claims 19, 27-34, 38 and 40, it is disclosed a first electrode 20, a second electrode 40 having three layers 42, 46 and 48 where the first layer 42 that comprises halide compound selected from potassium or sodium, a second layer

of 46 electronically active material 48 disposed between the first electrode 20 and the second electrode 40 where the second layer 46 is disposed between the first layer and the electronically active material 48.

Regarding Claims 2-4, 7, 8, 10, 38-40, 42 and 43, the required first and second electrode/layers are disclosed in Heller claims section specifically in claims 24, 25, 29-31

Regarding Claims 5,8, 15, 41 and 44, the required thickness is disclosed in Heller claims section specifically in claims 27, 29 and 34.

Regarding Claims 14-17, the required transparent electrode structure is disclosed in Heller claims section specifically in claims 27-33.

Regarding Claims 11-13 with required organic layer is disclosed in Heller claims section specifically in claims 27, 33 and 34.
